## Middle School Math Competitions Class

Taught by Baohong Wang

### ABOUT THE CLASS

MATHCOUNTS is a national mathematics competition that builds problem solving skills. The students will be building their knowledge of Algebra, Geometry, and other high-level subjects.

Learning MATHCOUNTS will help them apply the knowledge while developing problem solving skills.

TMSCA and UIL are similar as they cover many areas of middle school math. This includes Algebra, Geometry, Probability, and also number skills. The students will become faster at answering problems

and find success in school competitions when they learn and practice.

Time: Sunday 11:30am-1:00pm

**Your child will have more success in TMSCA, UIL, and MATHCOUNTS competitions when attending this class.**

**This will also help them with the student's school math grades too.**

I look forward to seeing you in class!

### CREDENTIALS:

- The teacher taught a team that went to State MATHCOUNTS
- Have many years of experience with TMSCA, UIL, and MATHCOUNTS
